

Expensive equipment, tools, and materials are often unattended, construction sites make for the perfect opportunity not only for thieves and vandals but a hazardous zone of unsuspecting children who simply see your site as a playground.

## Construction

Construction clients require the flexibility of the security service, to adapt as the project grows and appreciate the value of maintaining a secure site at all times. At Black Diamond Security we are excellence at providing just this type of service to some of the UK's largest companies.

As approved contractors to Vinci, John Sisk and Kier, just to name a few, you can be assured of our expertise in securing the most complex of construction environments.

## Utilities

Utility networks cover the length and breadth of the United Kingdom, their maintenance and renewal programs are critical to the safe and success of operating UK companies. The scale of such projects creates problems for security, especially in remote areas or sites.

When your sites are closed for the day the last thing you'll want to be thinking about is whether or not your equipment and hard work will be secure. Using a robust system of security that operates throughout the night.

## Services for:

- ◆ Natural Gas Station
- ◆ Nuclear Power Plants
- ◆ Electricity Power Plants
- ◆ Water Treatment Centres
- ◆ Waste Disposal and Recycling Plants

## Why use Black Diamond:
