BLACK DIAMOND SECURITY

Fire is the single greatest threat against your site / property. Makes sure you have a hi-tech fire safety security system may be the difference in life and death. You need to be prepared and act fast.

If your site handles volatile or flammable substances or just want to make sure you prepared, in the event of a fire. We have the range of systems to suit you.

Tailoring Solutions

Depending on your premises, Black Diamond will tailor the type of systems we use.

Making sure that only the highest quality manufacturers with a safety pedigree, such as CTEC, Advanced & RAFIKI is used. This will ensure the system works best.

Security Management

Black Diamond Security offers a range of fire alarms for internal & external structures or sites.

We offer conventional and addressable fire alarms.

Our systems have earlier warning benefits:

They increase evacuation time for building occupants.

Emergency medical help can be sent immediately.

Highly recommended that you have an alarm on each floor.

Technical Specification

Alarms meet BSEN5839:2013 and EN54 certified standards

The systems use advanced dress-able panel
