**PROJECT: DENABY MAIN  
PRIMARY SCHOOL**

**SECTOR: EDUCATION**

**LOCATION: DONCASTER**

## THE SITUATION

Denaby Main Primary School needed a reliable company to install & maintain an access control system for the school. The system would allow safeguarding of the children & monitor who was on site whilst also protecting the school from external unauthorised access & control internal doors.

## THE SECTOR

- Education

## THE SOLUTION / BUSINESS REQUIREMENTS

- Facial Recognition & Bio-metric Systems

## THE PROCESS

We installed a fob access control system. Fobs were issued for all staff and maintenance staff to ensure that security was maintained at all hours, without causing access issues.

By maintaining the system once, a month it ensures a reducing in problems, malfunctions and allows for the updating of registered personnel with Fobs.

## TESTIMONIAL

**“Black Diamond Security have always been reliable & the technicians are very polite. That is the reason we have been using you for many years”**

Andrea Robinson – School Business Manager

## THE EVALUATION

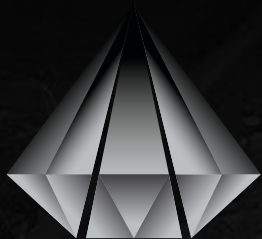

By having the system, it has protected the children for unauthorised member of the public. It also gives parents peace of mind that their child is in a secure safe environment. Internally they can control access to various doors which ensures the right people have access to the right areas within the school.
