WELCOME TO BLACK DIAMOND

Black Diamond Security provides technology Led security Solutions to a number of key market sectors, focussing on Asset Protection, People and Property.

The business is unique in the provision of Professional Security Services, when compared to the general market place within the UK in that:

- Our assessment of your security needs is paramount in the selection of the services we offer, and are tailored to your requirements.
- Technology Led Solutions are used in every case to complement, the deployment of personnel.
- All our security personnel are not only SIA Trained and Licensed, but undergo significant further bespoke training, again tailored to your specific assignment.

WHY CHOOSE US?

Black Diamond Security Ltd is an immensely capable, multifaceted provider of integrated security solutions to industrial and commerce, specialising in services to the Rail and Construction Industry. As such we have extensive experience in the following security and product provision sectors:

- **Manned Guarding**
- **Railway Security**
(including PTS, COSS, IWA trained personnel)
- **CCTV Installation & Maintenance**
(both mobile, fixed and Rapid Deployment Cameras)
- **CCTV Monitoring**
– from our National Control Centre
- **Perimeter Detection, Access Control & Security Fencing**
- **Dog Handling and Mobile Patrols**
- **Security Consultancy and Risk Assessments**
- **Mobile Patrol Services / Rapid Response**
- **Body Temperature Detection Cameras**

Our depth of service capability enables us to provide single or cross-service integrated security solutions to our business partners, providing them with the most economic and financially viable security packages available, provided within one carefully managed account.

Our ultimate aim is to develop strategic business partnerships with clients who recognise the value of long term, mutually beneficial relationships.

OUR WORKING LINE

We currently have a number of operations, offices and operational rooms across the UK already fully functional. This allows us the opportunity to provide our clients a nationwide 24/7 service.

Each client has a dedicated account manager that is assigned to their geographical area. This means, not only do we have specialised personnel throughout the UK, we also have a national control centre to oversee your business 24/7 giving you peace of mind that your business, site and assets are protected.

We pride ourselves on being not only reactive but proactive to deliver a quality professional service with the personal touch.

OUR SERVICES

Our tailor made services offer complete peace of mind and allow you to focus on your objectives without having to worry about security issues.

ASSET RISK MANAGEMENT

We assess each site on an individual basis to determine any possible risk, as we understand that no site or business are ever the same.

By identifying risks early, we personalise a solution to protect your assets and reduce the risk of any disruption to your business.

Manned Guarding

Black Diamond Security provide a highly professional Manned Guarding service that is proven to be a successful visible deterrent in many industry sectors.

Our security guards are all SIA Licensed, PTS and CSCS card holders and are hand-picked to ensure that they represent, not only our company to the best standards, but also to project the professional image of your company also.

By becoming an trained extension of your team we can support you with enforcing security for controlling goods in and out, stop and search of individuals and vehicles, providing access to site to authorised personnel, mobile patrol units or monitoring CCTV – we are here to cater for your needs.

Canine Services

Our effective dog handling teams are specially trained to protect you, business and your assets. Security dog handling teams are an extremely effective visual deterrent for criminal activity. Not forgetting that the presence of security dogs can reduce the amount of security personnel required for many situations.

Covert and Overt Operations

We provide both covert and overt solutions to protect high risk, high value assets. This can include rail patrols, holistic security solutions, complemented and implemented with the Police and British Transport Police (BTP) All our operatives have ex-military background, and deliver first class services.

24/7 National Control Centre

Security never sleeps and neither do we. With our 24/7 National Control Centre we can provide a responsive approach that includes a management facility that can direct 24-hour callouts, technical support, vehicle maintenance, logistical and administrative support, all of which is a hallmark of our success.

TECHNOLOGY

RDC

Rapid Deployment Cameras (RDC's) are a perfect solution for sites without 24/7 power, they can be used in conjunction with manned guarding services or independently. RDC's can be operational within the hour and an escalation process will be set up with the client. They are designed to be a temporary solution for an at-risk site.

Fixed CCTV

Surveillance is a priority for any site, whether it be your residential property or your offices. 24/7 fixed CCTV offer the latest in technology for monitoring your site.

The use of CCTV on your site or property provides a highly visible deterrent to potential intruders, whilst allowing you to see at any given moment, who is on your site with access to our mobile app.

BDEYE

The BDEYE is an external self-sufficient motion sensor intruder system with video verification. This rapid response system is a visible deterrent with the ability to work in harmony with other security solutions such as on-site guards or mobile patrol.

The BDEYE is a wireless battery operated PIR (Passive Infrared) with video verification, which is triggered by motion detection. The BDEYE System is intended for outdoor applications such as void or vacant properties and ideal for perimeter monitoring.

Remote monitoring.

All our security solutions come with automated signalling, informing the appropriate person when a fire or smoke has been detected.

Access Control/Biometrics

We offer a full assessment, installation, maintenance and repair services for all domestic and commercial applications.

110VRDC

110V Rapid Deployment Cameras (110VRDC's) are perfect for sites with mains electric or a generator running 24/7. They can be used in conjunction with Manned Guarding services or independently on their own. On arrival of the 110VRDC's an escalation process will be set up with the client. They are designed to be a semi-permanent solution for a site that is at risk but also for a site that will develop and may need the CCTV moving as the risk moves.

COMPLIANCE AND ACCREDITATION

The SafeContractor scheme provides a health and safety audit service for contractors who want to reassure their clients that health and safety is being handled correctly and sufficiently on their sites.

The aim of the SIA Approved Contractor Scheme is to raise performance standards and to assist the private security industry in developing new opportunities. The Private Security Industry Act 2001 requires the SIA to establish a "system of inspection for providers of security services, under which those organisations who satisfactorily meet the agreed standards may be registered as approved, and may advertise themselves as such".

Black Diamond Security currently holds a nqa ISO 9001:2015. UKAS accredits the certification for Quality Management Systems. It provides the basis for effective processes and effective people to deliver an effective product or service time after time.

Black Diamond Security Ltd currently holds The Railway Safety Accreditation Scheme (RSAS). The Scheme helps to tackle low level crime and anti-social behaviour, improve intelligence and maximise public confidence.

Black Diamond Security currently holds an HABC Level 3 Diploma for our Canine Patrols Service.

The HABC Level 3 Diploma for a Security Dog Handler aims to provide a single but multi-discipline qualification for the professional Security Dog Handler.

This qualification has been developed by NASDU to encompass a number of disciplines which meet National Occupational Standards (NOS) and the training requirements within BS 8517 Part 1 and 2.

Experienced Security Dog Handlers working both General Purpose, Security Dog Handler and Detection Dogs.

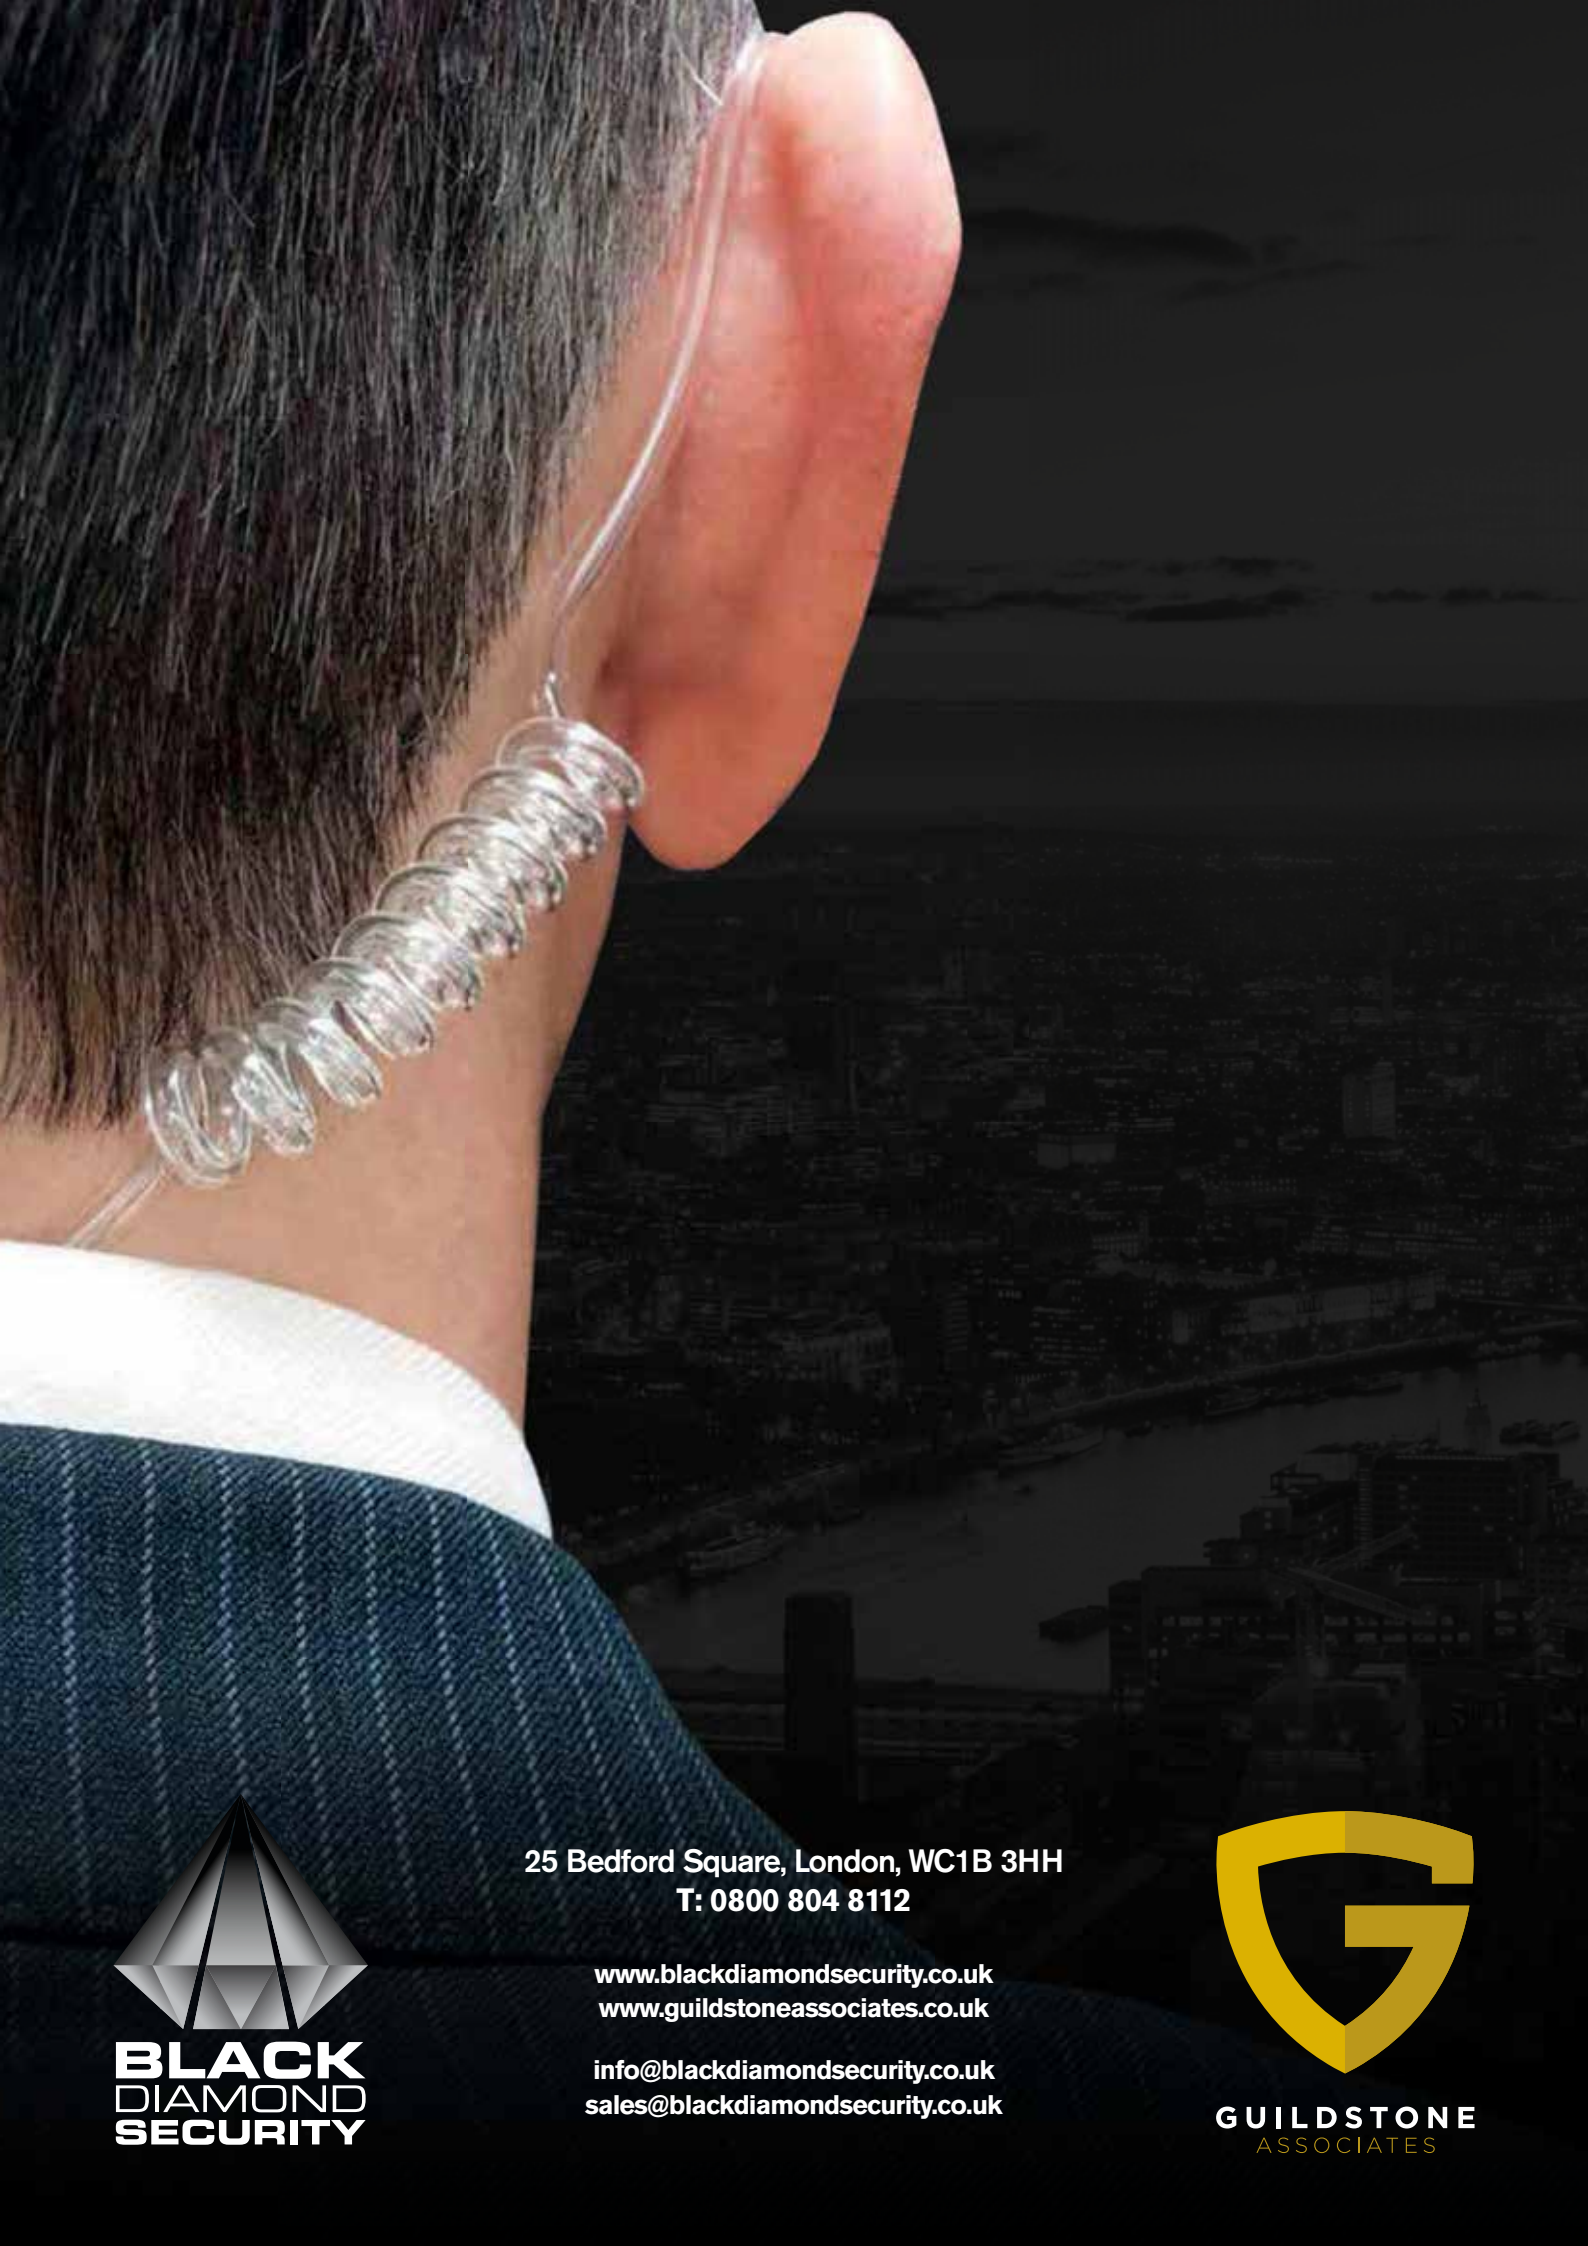

HABC – An awarding organisation approved by the Regulatory Authority OFQUAL and recognised by the SIA.

Black Diamond Security Ltd currently holds a RISQS Qualification & Verification.

RISQS provides customers with a more rigorous process for deriving much higher levels of assurance than registration and qualification. It involves providing documentary evidence that there has been a successful assessment, a process which requires differing degrees of intervention at the supplier's premises, dependent on the risk that the product or service represents.
