

**SECURITY EYE:
360 DEGREE DETECTION UP
TO 15 METRES AWAY.**

PROVIDING 24/7 SECURITY.

**NOTIFICATIONS TO YOUR
MOBILE DEVICE AND TO
OUR NATIONAL CONTROL
CENTRE.**

**THE LATEST VISUAL
VERIFICATION
PROTECTION SYSTEM.**

Security EYE with a footprint of less than 1 square meter is ideal for small sites. As the Security EYE can be easily relocated around site it is also beneficial on sites where plant/possessions are being stored in new locations on a regular basis. The Security EYE can be set up so that upon activation there is a strobe light and loud siren or activate silently.

The Security EYE when in transportation mode halves in size allowing clients to relocate it in a car boot from one site to the next.

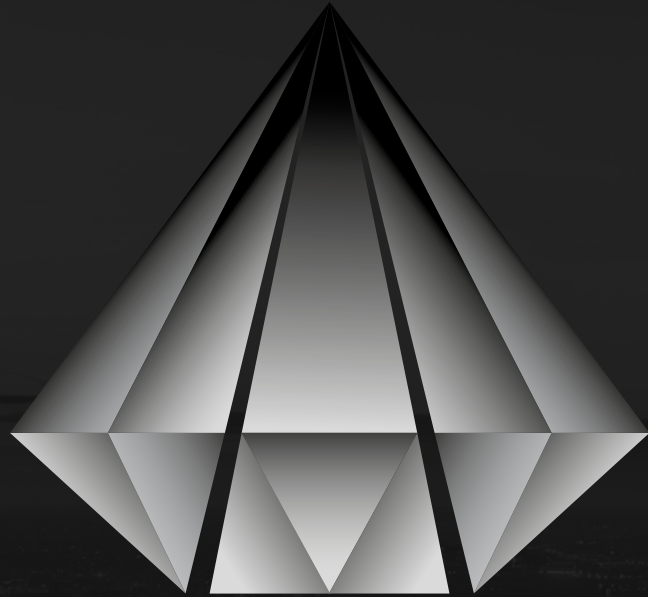

SECURITY MANAGEMENT

- Manufactured in house by our technology department.
- Built in a robust anti-vandal housing protecting internal components.
- Works independently with 6 months battery and solar additions to provide indefinite run time.
- Monitored 24/7 via our National Control Centre.
- Smartphone access with full audit trail so you know when your site is secure.
- Expandable, the Security EYE can have additional detachable eyes wirelessly connected so that one system can have up to 50 additional detectors.

TECHNICAL SPECIFICATION

- Visual Verification system, providing up to 15 meters detections.
- Self-sufficient power.
- Dual global sim to eliminate down time due to signal outage.
- Loud siren for audio deterrent
- Bright Strobe light for visual deterrent.
- Ability for client to activate siren/light if required.
- Eco-efficient design.
- 360 degree detection.
- Geo Fencing to show where the unit is.
